[LinkedIn](#)

Improving software reliability by combining manual testing, test automation, and a strong understanding of development workflows. Interested in building testable systems, not just testing features.

Experience

Junior Software Quality Assurance Engineer

LawAdvisor Ventures Ltd

August 2025 - Present

Managed test cases in Jira and Xray, performed manual, sanity, and smoke testing, and possess solid working knowledge in API testing using Swagger UI, including validating endpoints, requests, and responses.

Software Quality Assurance Intern

LawAdvisor Ventures Ltd

April - July 2025

Managed Jira and Xray for issue tracking and test documentation, created and executed test cases, verified release tickets, and gained hands-on experience with Selenium IDE for automating core functionalities.

Software Engineer - AI Training Data

Outlier.io | Freelance/Contract

September - December 2024

Analyze and evaluate AI model responses, ensuring accuracy, relevance, and alignment with predefined criteria. Provide insights and feedback to improve the quality of AI-generated outputs and training data.

Educational Attainment and Achievements

National University - Manila

Bachelors of Science in Computer Science with specialization in Digital Forensics

August 2025

Diliman Solution Challenge 2023 Grand Finalist

March 2023

Proposed a solution leveraging Google technologies to address the UN Sustainable Development Goals during a flagship Google Developer Student Clubs event at the University of the Philippines Diliman.
